JIB CRANE ACCESSORY

FOR MOTOR
CHANGEOUT

The portable jib crane pedestal is welded to the fan roof base. The two piece jib (83 lbs) is assembled and bolted to the base.

To remove fan for motor changeout, first remove bolts on fan inlet and nozzle (→). Then, hand crank to lift entire fan off fan inlet.

Fan can then be swung to side of mixing box...

and lowered to the roof. Nozzle separates from the fan as it is lowered, and remains on jib gantry.
